1. Introduction

The natural gas industry has acquired increased importance through the implementation of ambitious programs of exploration and development designed to ensure its future development. These programs have contributed to the creation of distribution networks and infrastructure, thus facilitating the provision of natural gas services to consumers. The document discusses the economic framework of a set of pricing policies.

4.9. Security standards and sanctions

Given the characteristics of the industry, the handling of gas requires the application of applicable standards and sanctions.
Additional mechanisms are established in order to avoid renegations and

The authority will issue the prescribed orders of the Board, such as orders to the consumer to make the payment of the disputed amount. The authority will also issue orders to the consumer to make the payment of the disputed amount, in accordance with the provisions of the Act. The authority will also issue orders to the consumer to make the payment of the disputed amount, in accordance with the provisions of the Act. The authority will also issue orders to the consumer to make the payment of the disputed amount, in accordance with the provisions of the Act. The authority will also issue orders to the consumer to make the payment of the disputed amount, in accordance with the provisions of the Act. The authority will also issue orders to the consumer to make the payment of the disputed amount, in accordance with the provisions of the Act.

6.1 Description

6. The Action Process

The action process begins with the receipt of a complaint from a consumer alleging a dispute over the quality or quantity of the gas supplied. The complaint is then investigated by the appropriate authority, and a decision is made to either resolve the dispute through mediation or to proceed to arbitration. If the dispute is not resolved through mediation, it is escalated to arbitration, where a panel of experts examines the evidence and makes a decision. The decision of the arbitration panel is final and binding on both parties. If the decision is not acceptable to either party, the matter can be escalated to the court system for a final resolution.

5.5 Elements of the Distribution Cases

The determination of the distribution cases involves the following elements:

(a) The consumer's rights and obligations under the distribution contract.
(b) The distribution system and its operation, including the quality and quantity of the gas supplied.
(c) The role of the regulator in overseeing the distribution of gas.
(d) The enforcement of regulations and the mechanisms for resolving disputes.
(e) The impact of the distribution system on the environment and the community.

G. Guidelines in the determination of distribution cases

The determination of distribution cases is guided by several principles:

(a) The principle of fairness and equity in the distribution of gas.
(b) The principle of transparency and accountability in the operation of the distribution system.
(c) The principle of public interest in the determination of distribution cases.
(d) The principle of proportionality in the allocation of costs and benefits.
(e) The principle of least impact on the environment and the community.
6.5. Application for Determination of* 

An application is required to determine the proposed action/proc. 

An application for the purpose of obtaining approval to proceed with the proposed action/proc. must be submitted to the appropriate authority in accordance with the procedures set forth in the applicable regulations. The application must include detailed information about the proposed action/proc. and any environmental and public comment issues that may be relevant. 

All applications must be accompanied by a fee set by the relevant authority. The fee is determined by the size and complexity of the proposed action/proc. and any associated environmental or social impacts. 

If the application is deemed complete, the authority will schedule a public hearing or other public notice to allow for public input and comment. The public has the opportunity to provide written comments or attend the hearing to express their concerns and provide feedback. 

The decision of the authority is based on a thorough review of the application and public comments. The decision will be made in accordance with established criteria and guidelines. 

In the event that the application is approved, the authority will issue a permit or authorization to proceed with the proposed action/proc. The permit or authorization will outline the conditions and requirements that must be met to ensure compliance with all applicable laws and regulations. 

If the application is denied, the authority will provide a written explanation of the reasons for the denial and the procedures for appeal. The applicant may choose to seek further information or pursue other options. 

Additional information may be required during the review process, and the applicant will be notified of any additional requirements. The applicant is responsible for ensuring compliance with all requirements and deadlines. 

Successful completion of the review process and receipt of a permit or authorization are necessary to proceed with the proposed action/proc. Failure to comply with the conditions and requirements may result in penalties or other legal consequences. 

In summary, the application process is designed to ensure that the proposed action/proc. is conducted in an environmentally and socially responsible manner, and that any potential impacts are adequately addressed.
Proposed Action Procedure

Annex
17. Once the executive power has been expressed, the distribution shall have the obligation of immediate execution and a note for bad reputation shall be considered in future proceedings.
